

# Lab 8

---

## Question 2

```
jhopkinswalker@cis106vm:~$ vim
jhopkinswalker@cis106vm:~$ vim linux+other.md
jhopkinswalker@cis106vm:~$ cat linux.md
# What is Linux?
Linux is open source operating system, OS.
# 3 Reasons to use Linux:
* You should use it because its open source, available to everyone.
* The cost isnt high, its free.
* Envrionment is user friendly, community support.

jhopkinswalker@cis106vm:~$ cat linux+other.md
# What is Linux?
Linux is open source operating system, OS.
# 3 Reasons to use Linux:
* You should use it because its open source, available to everyone.
* The cost isnt high, its free.
* Environment is user friendly, community support.
# Other operating systems
* **Microsoft Windows** is a group of several proprietary graphical operating system fami
lies, all of which are developed and marketed by Microsoft.
* **macOS** is a series of proprietary graphical operating systems developed and marketed
by Apple Inc.
* **FreeBSD** is a free and open-source Unix-like operating system descended from the Ber
keley Software Distribution (BSD), which was based on Research Unix.
* **RISC OS** is a computer operating system origally designed by Acorn Computers Ltd in
Cambridge, England.

jhopkinswalker@cis106vm:~$ cat GNU+Linux.md
# What is GNU+Linux?
GNU+Linux is open source operating system, OS.
# 3 Reasons to use GNU+Linux:
* You should use it because its open source, available to everyone.
* The cost isnt high, its free.
* Environment is user friendly, community support.
